

Online Agri Pet Zone

Key Points :

1. All we are providing is basic need...so if you want to add more thing according to your understanding, please add them.
2. When admin or farmer will add animal keep one field for description where they can add details about animals.
3. **IDE(eclipse), Backend(Java: jsp and servlet) and database (mysql) must be same as mention in this file.**

Intro:

Online Agri Pet Zone is website where farmers can sell and buy their animals through online mode (like online shopping . All animals will be available and from that animals farmer can add animal to cart and then he will proceed for buying). Also farmer can keep their animal in auction if they want to.

Technology:

Backend : Java (JSP and Servlet)

Database : MySql

Frontend : (HTML CSS)

IDE : Eclipse

Modules :

1.Administration:

- Login
- 1. Add, Remove, Edit Animals
- 2. View Orders, Cancel or Approve Orders
- 3. Assign vehicle details to confirmed order(for picking up that animal from Seller's address and deliver animal to buyers address)
- 4. Report Generation (Monthly)
- 5. And other admin function with your idea
- 6. *Feedback given by users should visible to admin*

2.Farmer :

- Register
 - Login
- 1) View all available animals to buy
 - 2) Search animal
 - 3) Add to cart
 - 4) After adding it to cart proceed to buy (and when the order will confirmed that animal should delete from all animals list)
 - 5) Sell Animals
 - 6) View order details
 - 7) Edit personal details (password, mobile, address)
 - 8) Return animal (when animal will be returned then that animal should display in all animals details)

3.Auction :

Keep one module like where seller can add animal and its base price, then interested farmers will add their price . in this section when farmer visit the auction module then base price and max price (given by another farmer) should be visible. Then farmer will put his price and when deadline will passed then animal will sold to the farmer who have had maximum price

4.Driver/Delivery boy:

- Register
 - Login
- 1)Name
 - 2) Contact Details
 - 3) Vehicle Details
 - 4) Order Details that from where to pick and where to deliver
 - 5) Payment to collect (if order is COD)

5. Vehicle / Transport Details:

- 1) Vehicle Name
- 2) Number
- 3) Driver Contact Details

6. Animals Management:

If possible, divide animals in 4 Categories

- a) Bull
- b) Cow
- c) Buffalos
- d) Ships
